

# Think Hybrid.

High gas prices got you down? Now more than ever it makes sense to buy a car with good gas mileage. The car you drive makes a big difference – for your wallet and our environment. Hybrid gasoline-electric cars produce a fraction of the global warming pollution of other vehicles, and save you lots of money on gas, too. For your next car, think hybrid.

## Think about our air.

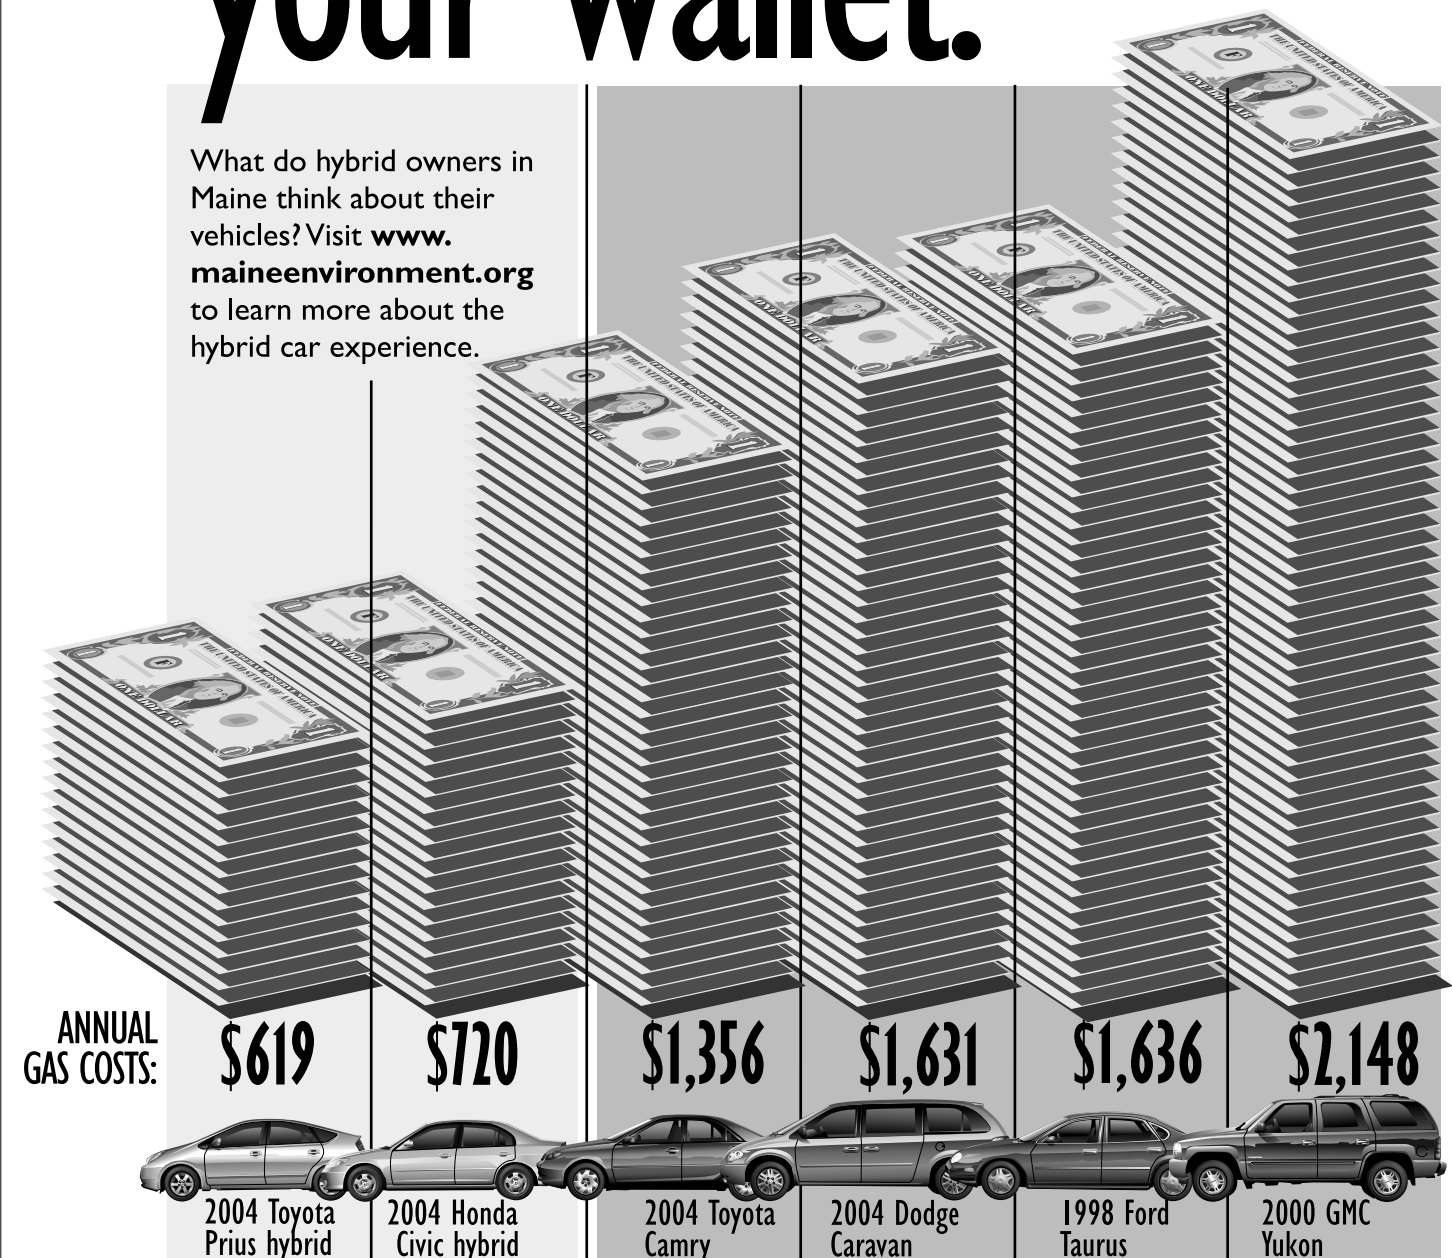

## Think about your wallet.

For more information, contact 1-800-287-2345

What do hybrid owners in Maine think about their vehicles? Visit [www.maineenvironment.org](http://www.maineenvironment.org) to learn more about the hybrid car experience.

Annual gas costs based on 12,500 miles per year, \$2.75 per gallon. Data on global warming pollution for each vehicle available at [www.environmentaldefense.org/TailpipeTally/](http://www.environmentaldefense.org/TailpipeTally/) Federal and state tax incentives are available for hybrid vehicle purchases; check auto dealers for details.
