

## LD 1416

# Destroys Maine's Uniform Building and Energy Code

*LD 1416 eviscerates Maine's Uniform Building and Energy Code by making it voluntary for over 400 cities and towns with less than 4,000 population (in red). Maine will become one of only 10 states in the U.S. without a uniform statewide code. Maine people in smaller towns won't be protected from buying new homes that waste energy.*
