

Photosimulation 3A: Normal view looking southwest from the northern end of Lower Pistol Lake toward the proposed Passadumkeag Wind Project. Approximately twelve turbines would be visible from this location at distances of 5.6 to 9.5 miles. Viewer should hold this image, when printed at 11" x 17", approximately 21" from eye to replicate actual view.

Photosimulation 5A: Normal view looking southeast from Saponac Pond toward the proposed Passadumkeag Wind Project. Approximately ten turbines would be visible from this location at distances of 4.0 to 4.9 miles. Viewer should hold this image, when printed at 11" x 17", approximately 21" from eye to replicate actual view.

Photosimulation 1A: Normal view looking west from Duck Lake Cove on Nicasious Lake toward the proposed Passadumkeag Wind Project. Approximately eight turbines would be visible from this location at distances of 7.6 to 10.7 miles. Viewer should hold this image, when printed at 11" x 17", approximately 21" from eye to replicate actual view.
