

# SENATOR COLLINS AND SENATOR KING

Protect Maine. Protect our health. Protect our environment.

Vote **AGAINST** Scott Pruitt as EPA Administrator

We urge Maine’s Senators to vote against Donald Trump’s nominee, Scott Pruitt, to lead the Environmental Protection Agency (EPA). Here’s why:

- Pruitt has repeatedly sued the EPA to block clean air and clean water standards that protect the health of Maine people and all Americans.
- Pruitt denies the overwhelming scientific consensus that climate change is real and driven by human-made air pollution. Climate change already threatens Maine people and our economy.
- Pruitt worked to prevent EPA from stopping mercury pollution that comes to Maine from power plants in upwind states. Maine’s fish and wildlife have the highest levels of mercury contamination in the nation.
- Pruitt received more than \$300,000 in dirty fossil fuel industry donations and is beholden to their interests. He would give a green light to polluters to send more air pollution Maine’s way.

**We need Maine’s Senators to give a red light to Mr. Pruitt.**
