Washington, DC 20515

Ranking Member Frank Pallone  
House Energy and Commerce Committee  
2322A Rayburn House Office Building  
Washington, DC 20515

Dear Chairmen and Ranking Members:

We are writing to encourage you to exercise oversight over recent Environmental Protection Agency (EPA) actions that compromise the integrity of science advice at the EPA. The decision to exclude scientific advisers who receive EPA grants compromises the EPA's ability to use the best available science to carry out our nation's bedrock public health and environmental protection laws, including the Clean Air Act and the Clean Water Act.

On October 31, 2017, EPA Administrator Scott Pruitt dismissed all scientists who receive EPA funding for their scientific work from EPA scientific advisory committees. In their place, he appointed several individuals that have track records of misrepresenting mainstream scientific understanding, promoting conspiracy theories, and directly representing industries that are financially impacted by EPA decisions.

Earlier in the year, Administrator Pruitt discharged half of the independent scientists who serve on the EPA's Board of Scientific Counselors. Collectively, these actions make it far easier for the agency to politicize science in making decisions while avoiding accountability for doing so.

Scientists who have advised both Republican and Democratic administrations have long recognized the need for independent scientific advice. In fact, Terry F. Yosie, the chair of EPA's Science Advisory Board (SAB) during the Reagan administration said Administrator Pruitt's recent actions "represent a major purge of independent scientists and a decision to sideline the SAB from major EPA decision-making in the future."<sup>1</sup>

Scientific advisory committees exist to evaluate the best available evidence, not to make policy recommendations. By his recent actions Administrator Pruitt has essentially said that he does not trust the advice of the scientists that the EPA believes are most deserving of grant funding. This makes absolutely no sense.

Congress has long recognized that experts with the most relevant expertise who have no stake in regulatory outcomes are best positioned to provide independent scientific advice. Advisors should be selected based on scientific and technical expertise, not on the stakeholders they represent. Administrator Pruitt has fundamentally rejected this principle, further endangering the independence of the EPA.

Scientists are therefore given a false choice: apply for EPA grant funding or serve your country as a science advisor. Unfortunately, the decision to compromise the independence of science advisory panels

is just one example of how science has been sidelined and politicized at the EPA. Former Republican and Democratic EPA Administrators have repeatedly expressed concern about the impact of Administrator Pruitt's actions on public health and safety.

Without the best available scientific advice, the EPA will be ill-equipped to tackle emerging environmental and public health challenges, and the American people will suffer. We encourage you to bring attention to the misuse of science at the EPA and ask relevant committees to conduct appropriate oversight of Administrator Pruitt's actions to get the agency back on track towards protecting our nation's people.

Sincerely,

The undersigned,  
1064 scientists and technical experts

Cc:

The Honorable Paul Ryan

The Honorable Mitch McConnell

The Honorable Nancy Pelosi

The Honorable Charles Schumer

Members of the U.S. House Committee on Science, Space, and Technology

<sup>1</sup> *In unprecedented shift, EPA to prohibit scientists who receive agency funding from serving as advisers*: [https://www.washingtonpost.com/news/energy-environment/wp/2017/10/30/in-unprecedented-shift-epa-to-prohibit-scientists-who-receive-agency-funding-from-serving-as-advisers/?utm\\_term=.d05c1022fff7](https://www.washingtonpost.com/news/energy-environment/wp/2017/10/30/in-unprecedented-shift-epa-to-prohibit-scientists-who-receive-agency-funding-from-serving-as-advisers/?utm_term=.d05c1022fff7)
