Bonjour Maine! We're Hydro-Québec, your neighbor to the north.

As you've no doubt seen and heard on the news, there are many exciting developments in Maine regarding renewable energy, with initiatives to bring more low-carbon electricity into the New England power grid.

Decades ago, Québec began developing its water resources to provide clean power locally and to neighboring provinces and states. Today, we have one of the largest hydropower systems in the world, with the capacity to effectively and extensively reduce our collective carbon footprint.

Over the past several weeks, Hydro-Québec has shared information about hydropower and the benefits of this renewable energy source for all of us living in the Northeast—on both sides of the border. You'll be seeing and hearing more from us as we work side by side with you to address our warming climate.

À bientôt,
Hydro-Québec
