2020 NRCM Legislative Bill Tracking

In response to the COVID-19, the Maine Legislature adjourned on Tuesday March 17, 2020. Lawmakers did not re-convene for a Special Session. Many important pieces of environmental legislation remain unfinished.

NRCM reviews every bill under consideration at the State House to determine which ones deserve support and which ones should be opposed based on their potential impact on Maine's environment. This page provides information on the priority bills that we followed during the 2020 legislative session.

A great way to stay informed during the session is to <u>sign up for NRCM's Action</u> <u>Network</u>. You can choose issues of importance to you and get emails and links to action alerts so that you can make your voice heard at a moment's notice when your legislators need to hear from you most on issues related to Maine's clean air, clean water, sustainable forestry, wildlife habitat, and more.
